

Andrea Izzillo

Seeking a final-year internship

Computer Graphics, Vision & Image Processing

Available from February 2027

PROFILE

I am a 22-year-old student at EPITA, passionate about computer science, especially imaging, computer vision and computer graphics. The projects I have completed throughout my studies have confirmed my desire to build a career in this field. Outside of computer science, I enjoy video games, travelling and riding motorcycles.

EDUCATION

EPITA
2022 - 2027

Shibaura Institute of Technology 芝浦工業大学
2024

Lycée Jean Monnet
2019 - 2022
French Baccalaureate
Mathematics & Computer Science
Highest honours

LANGUAGES

FRENCH	NATIVE
ENGLISH	BILINGUAL *TOEIC 950*
JAPANESE	INTERMEDIATE

TECHNICAL SKILLS

C / C++	**OPENGL**	**UNREAL**
C#	**GLSL**	**UNITY**
JAVA	**CUDA**	**GODOT**

EXPERIENCE & PROJECTS

Doom-like 2.5D Engine
April 2026 - May 2026
- 2.5D engine recreating Doom's rendering system
- Built from scratch in **C++**, without graphics libraries

Miniature Solar System
June 2026
- Creation of an imaginary solar system in **OpenGL**
- Implementation of shaders and 3D animations

Software Development Intern at R&D Vision
September 2025 - February 2026
- Contribution to IOTools, software for controlling optical devices; Windows environment with **.NET**

GPU Object Segmentation
July 2026
- Foreground/background segmentation built with **CUDA**
- Real-time video stream processing

Photorealistic PBR Rendering Engine
September 2026
- Physically based rendering engine with a BRDF based on Lambert and Cook-Torrance GGX

ChromAura - Bring Your Silhouette to Life
September 2026
- Creation of an immersive experience using a **Kinect**
- Scoping, design, development and deployment

Stellantis - Embedded AI and Vision
July 2026 - January 2027
- Final-year project in collaboration with **Stellantis**
- Design of an embedded vision system for a vehicle
